Viatec UK Manhole cover lifter

A manhole lifting device that has been developed to remove all manhole covers in any location. The device is heavy duty yet portable (less than 20kg) and compact, providing rapid and safe lifting, proven through success in numerous site trials. The lifter is capable of exerting a working lifting force of up to 2,000kg and has been tested up to 4,200kg.

It will handle manhole covers comprising more than one piece as well as those which have been rendered immovable through corrosion. With no hydraulics, the unit is self-serviceable, minimising any repair time and costs. Non-standard keys are also available on request.
