

Viatec UK Reflective roadstuds

The 3M roadstud series is a high performance surface-mounted reflective roadstud. The reflective road studs boast computer-aided design combined with advanced optical technology and hard ceramer coatings to produce a highly reflective, long lasting roadstud.

Benefits & features:

- Versatility – suitable for any position on all road surfaces; available in various colour combinations
- Direct application to the road surface (new asphalt, concrete and existing asphalt road surfaces) using 3M approved hot melt bitumen adhesive
- Durable – specifically designed for today's heavily used roads & motorways and manufactured from high resistant polycarbonate resin
- An inner rubber contour shaped to dissipate tyre impact increases strength and reduce damage
- Tough polycarbonate microprismatic reflective lens features a ceramer abrasion-resistant coating
