

Viafix 24Seven® high performance cold storage asphalt

- A unique cold storage asphalt system which produces bespoke measured quantities of high performance asphalt without waste
- Can be laid in all conditions – even at 0°C in rain / surface water
- Unmixed / non-catalysed Viafix 24Seven® has unlimited shelf-life
- Simple mixing process: bagged pre-coated mix and catalyst are combined in a pan mixer on site / at depot

- Enables first time permanent patching and immediate response in all weathers
- Removes the need for and expense of hot boxes
- Eradicates waste of both hot and cold materials
- Viatec's cold, solvent-free technology is environmentally friendly and confers COSHH / risk assessment safety benefits
