Viatec UK Pipe & Cable Location (Standard)

Pipe & Cable Locator (PCL)

Viatec's PCL is a full function, industry standard locator. It comes with an earpiece for use in noisy environments and can locate to a depth of 3m. Lightweight and robust, it operates in three modes

- **Power Mode** - Locates live cables radiating a detachable signal.
- **Radio Mode** - Locates metallic conductors radiating a detectable VLF signal.
- **Generator Mode** - Locates metallic conductors carrying a detectable signal by induction or connection using the signal generator.

Signal Generator

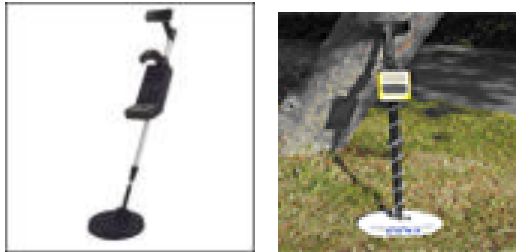

For use in conjunction with the PCL, the generator applies a signal by induction or by direct connection to the service required with the appropriate lead. The generator comes complete with 3 pin plug connector, direct connection leads and earth stake.

Signal clamp

Enables safe application of a signal to insulated conductors without the need for removing the insulation. A further advantage is provided through the addition of a distinct signal to the dedicated service reducing the chance of the signal coupling onto other services.

Diameter: 100 mm

Metal detector

Industry standard, the Viatec metal detector includes; two tuning controls, extendable shaft, headphones and loudspeaker.

Range: 10cm x 10cm box cover to 40cm

22.5 cm x 22.5 cm box cover to 55cm

Larger objects up to 90cm

Weight: 1kg
