VIATEC: UK Environmental Policy Statement

Introduction

Viatec is committed to being a highly successful road safety products company. As part of our commitment to the environment we have developed this policy which has been endorsed by the Management Board and will be communicated to all employees. It forms the basis for setting environmental objectives that will continually improve the manner in which we approach our business.

Objectives

- To identify and minimise the risks to the environmental legislation from the company's activities.
- Comply with current environmental legislation and where appropriate act in anticipation of future requirements.
- Set targets and implement suitable arrangements to seek continuous improvement of environmental issues within the business.

Policy

To achieve these objectives the company will;

- Adopt as principles the prevention of pollution, reduction of waste and the efficient use of materials and energy.
- Utilise sustainable materials and products, which are reusable or can be recycled. Where necessary, we will ensure that all wastes, particularly hazardous or contaminated wastes are tested, transported and disposed of in an environmentally acceptable manner, in accordance with statutory duty of care requirements.
- Minimise noise levels, traffic nuisance, emission of pollutants and disturbance to the public and local ecosystems.
- Review our activities and determine those, which could have a significant impact on the environment.
- Minimise the risk of environmental accidents through the formulation and adoption of appropriate risk management procedures and, in conjunction with appropriate authorities, we will ensure an emergency response capability to deal with accidental pollution.
- Expect our supply-chain to comply with this policy and meet environmental requirements
- Provide the necessary awareness and training to enable staff at all levels to understand and contribute to the implementation of this policy
- This Statement outlines the company's commitment to minimising the environmental impact from our activities and was fully reviewed by the Management Board on March 2007
